

Venus[®] 450

CLINGFILM DISPENSER

Stainless steel preparation tray.

Film holder with stainless steel rollers.

Safety guard conceals the Teflon coated hot cutting bar. Only when the pressure of the film brings the safety guard down is the hot cutting bar exposed.

FILM LOADING: The preparation tray, with loading diagram underneath, lifts up and stays in position to give easy access to the film guides.

Meat, vegetables, fruit, pastries retain their freshness and sales appeal.

The **Venus 450** features controls for the hot cutter bar and warming plate. A safety guard conceals the Teflon coated hot cutting bar to reduce the chance of accidental burning. Only when the pressure of the film brings the safety guard down is the hot cutting bar exposed. After cutting, the safety guard resumes its position automatically. With the **Venus 450**

Dispenser and **Venus** cling film it is easy to create sparkling, tightly wrapped packages. **Venus** PVC cling film, with its high grease resistance, high water vapour transmission rate, and high impact strength, retains freshness. Its excellent clarity and contour hugging softness shows off fruit, vegetables, meats and pastries to best advantage.

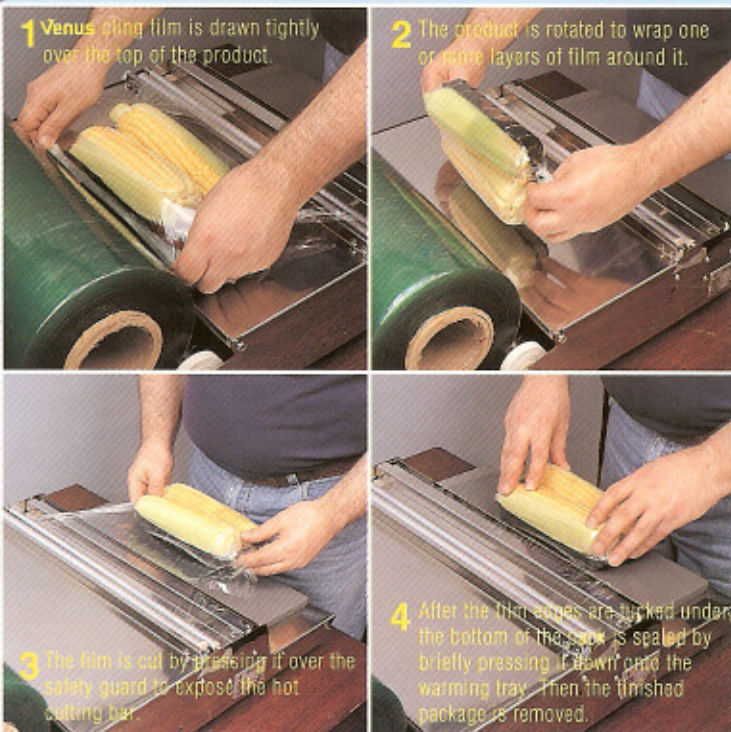

Separate warming plate On/Off switch and thermostat indicator light.

Adjustable warming plate temperature control.

Warming plate.

Separate hot cutting bar On/Off switch and indicator light.

Use **Venus** PVC Vegetable Wrap and **Venus** PVC Meatwrap cling films.

1 Venus cling film is drawn tightly over the top of the product.

2 The product is rotated to wrap one or more layers of film around it.

3 The film is cut by pressing it over the safety guard to expose the hot cutting bar.

4 After the film edges are tucked under the bottom of the pack, it is sealed by briefly pressing it down onto the warming tray. Then the finished package is removed.
